

Declaration of Conformity to the REACH Regulation

We are a so-called "downstream user" in the sense of the REACH regulation, as we neither manufacture nor import chemicals.

Therefore, we are neither subject to registration obligations according to REACH nor to the obligation to prepare safety data sheets.

Furthermore, to our knowledge, based on information from our suppliers, our products do not currently contain any substances above 0.1% by mass that are included in the so-called "Candidate List" according to Article 59 (1, 10) and Annex XIV of Regulation (EC) No 1907/2006 ("REACH"), as currently amended.

In order to secure the supply chain and in the interest of highest product safety, we demand and pursue the implementation of REACH also on the side of our suppliers. The assurance of REACH conformity is part of our supplier qualification.

Declaration of conformity to the RoHS and WEEE directives

We hereby confirm the conformity of our deliveries and services with the directives 2011/65/EU (RoHS), ElektroStoffV and 2012/19/EU (WEEE2). The declaration refers to those deliveries and services that are affected by the aforementioned directives and insofar as no exemptions exist for certain applications (e.g. military sector).
